A full stack Web developer, recently graduated from a Bootcamp from UCF with a unique combination of technical and interpersonal skills. These skills draw from a background in hospitality and electrical work. Notable strengths exhibited include collaboration, leadership, mentoring, attention to detail, troubleshooting, and a drive to take on new challenges and push abilities to the next level. The experience gained from growing up around IT support workers has provided a wealth of unorthodox experience that adds value to the developer's perspective.
